DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being unpatentable over Landress et al. (U.S. 2003/0191816)
Landress et al. disclose:

A system and method for providing an E-mail service through a portable terminal with a wireless Internet access function, comprising:

- a multimedia server (10) for receiving a multimedia E-mail message including multimedia data and E-mail data to be transmitted to the portable terminal, storing the multimedia data in an internal local memory, and adding uniform resource locator URL information of server on which multimedia data is stored, as a predetermined format string to the E-mail message; (abstract, paragraph [0004], [0007]-[0037])

- an E-mail server for receiving the E-mail message from the multimedia server and notifying the receiving portable terminal of the arrival of the E-mail message; (28a)
- the portable terminal for receiving the E-mail message from the E-mail server, parsing the E-mail message, and displaying the E-mail message with multimedia link information if the predetermined format string is confirmed, wherein an E-mail recipient can access data stored in a VOD server by selecting the multimedia link information from within an opened E-mail; and (28, 28a, 28b, and 29)
- wherein upon request for the multimedia data stored in the multimedia server, the multimedia data is transmitted in a streaming file format and if a user of the portable terminal selects a multimedia service, the portable terminal is connected to the multimedia server and then to a multimedia URL, and receives, reproduces, and outputs the multimedia data (paragraph [0113], [0119], [0131], and claim 49)
